Managed Services

Our Managed Service Agreement is the best option to ensure your business is getting the care it needs. This plan offers Remote Assistance, Offsite Backup, Network Administration, System Security, System Maintenance and much more. With our techs making regularly-scheduled onsite visits, we can ensure that your systems are functioning properly, routinely upgraded and secured.

More About Our Services

Why Do I need Offsite Backups?

In this day and age anything can happen, from viruses to hardware failures to natural disasters. Let us make sure your data is safe with our offsite backup plan. With it, your company can be up and running again in no time. Our backups are completely automated, so there's no need to change tapes, externals or disks.

What's so great about Remote Assistance?

It can save you time, something which we can all agree we never have enough of. Instead of waiting for a technician to arrive, you'll have near-instant virtual assistance. We can easily set up a link and help you on the fly to take care of the more common issues that may not need onsite support.

Our offsite backup partners and remote access software meet and exceed all Governmental compliance requirements such as HIPAA and GLBA.
